

## What is the Chart view?

In "Chart View" you will be able to track and compare your usage by day, week, or month.

Check out how your consumption compares to your local weather conditions or timeframe by selecting a **comparison** choice at the bottom of the graph or viewing the **top leader bar** above the chart next to your account information.

Use the “**Zoom**” or “**Range**” feature, to take a closer look at a specific date range or single day. Over time as the information from your meter accumulates in your dashboard, you’ll have the ability to compare changes in your water usage from the previous day, week, or month.
