

Water Conservation Program

Smart Irrigation Rebate Application

This rebate applies to specific upgrades to existing irrigation systems. Upgrading irrigation systems to increase efficiency reduces water use and water waste while improving the health of your landscape.

PROGRAM ELIGIBILITY:

- Applicant must be a direct City of Round Rock residential water customer, in good standing.
- Applicant must have an existing irrigation system; program does not apply to expansions or new installations.
- Property must have a working rain sensor at each controller. New sensors are eligible for rebate. If you have an existing sensor, include a picture of the device with your application.
- An itemized receipt(s) must be submitted with the application within 90-days of service. Receipt(s) must include date, irrigation company or vendor name and address, amount paid, and description of service(s) provided.
- Per State law, only the property owner or a Licensed Irrigator may make irrigation system repairs. A Licensed Plumber may also install pressure regulating valves. A list of Licensed Irrigators can be found on the [TCEQ Licensing Information](#) page.

REBATE DETAILS:

- Rebate amount *does not apply* to sales tax or delivery/shipping fees.
- New equipment rebate amount is 50% of the cost and installation of new device(s), except the drip conversion and capping a zone, which is a flat amount per zone.
- Irrigation check-up rebate is 50% of the cost of the entire system check and repairs made, up to a maximum amount of \$200.
- A pre-inspection is not necessary; however, you may be contacted for a final inspection of new equipment.
- Maximum total rebate amount is \$500 per residential account.
- Rebates are available until funds have been expended. Visit roundrocktexas.gov/rebates for rebate status.

EQUIPMENT/RETROFIT DETAILS:

- Pressure regulator: one valve that allows for adjustment of the water pressure in the irrigation system only or the main house water line, allowing for adjustment for both the house and irrigation system.
- Weather sensors: any freeze, rain, soil moisture sensor, or complete weather stations that use current weather conditions to determine irrigation times or amounts.
- Irrigation controllers: any [WaterSense labeled irrigation controllers](#) qualify.
- Flow sensor: water flow sensor installed on the irrigation mainline that alerts user to leaks &/or continuous flow.
- Conversion of entire zone to efficient, low volume nozzles and/or to efficient multi-stream, rotary heads, or low emission heads (i.e. Toro Precision Nozzles, Rainbird RN Nozzles, Hunter MP Rotators, K-Rain Rotary Nozzles, etc.). Applicable for the entire head with built-in pressure regulation, or just the nozzles. Any [WaterSense labeled spray sprinkler bodies](#) qualify.
- Conversion of zone to drip: conversion of an **entire zone** that is **currently** irrigated by spray irrigation. Drip system must have appropriate pressure regulation, filter, and pressure release valve. *Not applicable to newly added drip zone in an area that was not previously irrigated.*
- Capping an entire zone: the removal of a complete zone; not just a single head in a zone. This can be accomplished by removing the wire for that zone from the controller, removing the zone valve, capping any/all heads.

Water Conservation Program Smart Irrigation Rebate Application

APPLICATION PROCEDURE:

1. Read the Program Guidelines to ensure eligibility.
2. Submit application, picture of rain sensor and receipts within 90-days of installation.
3. No pre-inspection is necessary; however, you may be contacted for a final inspection.
4. Rebate check will be mailed 2-4 weeks after application has been processed and approved.

APPLICANT INFORMATION:

Name (same as utility bill): _____ Water CID-Account #: _____
 Address: _____ Zip: _____
 Rebate Mailing Address (if different): _____
 Email: _____ Phone: _____

Equipment*	Installed by	Quantity	Device Cost (excluding tax)	Rebate	Rebate Amount
Pressure regulating valve				50%	
Weather-based controller <i>(must be WaterSense)</i>				50%	
Weather station/sensor <i>(rain, soil, freeze)</i>				50%	
Flow sensor <i>(irrigation only)</i>				50%	
Conversion of entire zone to efficient nozzles <i>(rotary and/or pressure reducing)</i>				50%	

Retrofits*	# Zones Converted	Rebate	Rebate Amount
Conversion of entire spray zone to drip		\$75 per zone	
Capping or removing entire zone		\$50 per zone	

Irrigation Check-Up* performed by <i>(irrigation company name)</i>	Licensed Irrigator #	Cost of System Check & Repairs	Rebate Amount <i>(50% of cost up to \$200)</i>

*See Page 1 for rebate details.

Total Rebate _____
(not to exceed \$500)

Please sign to confirm you have read and agree to the Program Guidelines listed on Page 1 of this application.

Signature: _____ Printed Name: _____ Date: _____
